- Because, “Complete Streets” are achieved when transportation agencies routinely plan, design, construct, operate, and maintain the transportation network to improve travel conditions for all users in a manner consistent with, and supportive of, the surrounding community; and
- Because, the Michigan Legislature has passed “Complete Streets” legislation that requires the Michigan Department of Transportation and local governments to consider all legal users in transportation related projects; and
- Because, the City of Traverse City’s Infrastructure Strategy Policy already refers to “Complete Streets” and context sensitive solutions.
- Because, streets that support and invite multiple uses, including safe, active, and ample space for pedestrians, bicycles, and transit are more conducive to the public life and efficient movement of people than streets designed primarily to move automobiles; and
- Because, increased walking and bicycling offers the potential for improved public health, economic development, a cleaner environment, reduced transportation costs, enhanced community connections, and more livable communities; therefore, be it

The non-motorized plan shall be integrated into other transportation planning documents to routinely plan, design, construct, operate and maintain the transportation network for all users.

I hereby certify that the above Resolution was adopted by the Traverse City City Commission at its regular meeting of October 3, 2011 in the
