

Free Presentation for Homeowners and Arborists

Oak Wilt is killing oak trees in Michigan and the problem is getting worse.

Join us to learn how you can protect your trees from oak wilt.

Dr. David Roberts, Ph.D., Michigan State University, College of Agriculture and Natural Resources, is a Plant Pathologist who will explain:

- What oak wilt is
- What trees are affected
- What does (and does not) cause it to spread
- How to protect your trees
- Important dates and restrictions
- Removal, disposal, transport, and storage of diseased oak wood
- Guidelines for hiring a tree service or arborist.

Did we mention this is free?
