

DESIGNING THE CENTER OF OUR COMMUNITY

ENVISION 8TH

Located in the North Boardman Lake District, Traverse City Michigan

Public Kick-off Meeting

Next Wednesday April 20th 7pm
NMC Hagerty Center | 715 Front Street

Eighth Street has a self-professed identity crisis. As one travels the corridor, there are nodes of walkable development that channel downtown, which then mix with auto-oriented uses with large front parking lots; all on one of Traverse City's most busiest streets.

The 2013 Corridors Plan did the hard work of identifying the various land use, right-of-way, traffic, and aesthetic issues along the corridor. It also identified important potential redevelopment sites, which will be used as starting point for the charrette process.

The charrette will offer an opportunity for residents and the City to dive deeply into these issues and establish a vision, and ultimately, design solutions for Eighth Street, as well as surrounding land uses.

The street design for Eighth Street will be approached through several methods including transportation planning and engineering, streetscape design, and codified form-based code street types.
