ADDRESS	Date:
TRAVERSE CITY, MI 49686	

**RE: CROSS CONNECTION CONTROL SURVEY ADDRESS: ADDRESS
TRAVERSE CITY, MI**

Dear Traverse City Water Customer:

You are receiving this letter because your participation is required in meeting our Cross Connection Control program, as required of all water systems under Michigan Public Act 399, 1976. The purpose of this program is to identify and eliminate cross connections to the potable water system, preventing contaminants and ensuring that all water customers have safe drinking water.

Traverse City has retained CCRA Professional Services to survey the potable piping systems within the buildings. The survey is necessary in order to identify those potable water systems that require installation of a backflow prevention device. Accordingly, we will be surveying your property Date to Date. To help avoid any inconvenience, you can schedule an appointment. If no appointment is made, we will attempt to complete the inspection by making a personal visit to request permission for access. Your cooperation in meeting this state mandate is appreciated.

Please refer to the City of Traverse City Website @ <https://www.traversecitymi.gov/> to ensure the validity of this and also to see a copy of the letter sent.

Should you require further information on the Cross-Connection Control Program, or you wish to schedule an appointment to have the survey completed, please contact us at (630) 450-7781.
