
Memorandum

The City of Traverse City
Engineering Department

TO: Timothy J. Lodge, P.E., City Engineer
FROM: Abhishek Deora, Seasonal Engineering Aide
DATE: Monday, August 21st, 2017
SUBJECT: 24 Hour Speed and Volume of Wayne St between Monroe St and Incochee

City Engineering performed a 24 hour speed study on Wayne St between Monroe St and Incochee beginning on Thursday, August 17th, 2017 concluded Friday, August 18th, 2017. This memo is to formalize City Engineering's initial data observations and findings with to the speed statistics and volume of vehicular traffic on Wayne St.

The data was gathered using a JAMAR Radar Recorder, this data recorder collects both vehicle speed and volume using radar sensors in both Northbound and Southbound lanes. The raw data compiled and analyzed using TraxPro and reported vehicle speed count for every hour during the study in the increments of 5 miles per hour. The TraxPro software also compiled a report to be sent Traverse City Police Department to evaluate the possible percentage of enforceable violations. This data is organized into a small colored meter where red means there is a high enforcement potential and green equates to a low amount of speed infractions are occurring. For this report, the enforceable minimum speed a vehicle would need to be traveling is 5 miles per hour over the posted speed limit of 25 miles per hour.

During this 24 hour study, 752 vehicles were recorded. The average (mean) speed of the 752 vehicles is 28 miles per hour, with 71.6% of all vehicles traveling at speeds greater than the posted limit of 25 miles per hour. Giving motorist an extra 5 miles per hour over the posted speed limit for enforcement tolerance, the number of vehicles speeding is 37.2%.

Summary (Combined):

- **Mean Speed:** 28 MPH
- **Number of Vehicles above Posted Speed Limit** 71.6%
- **85th Percentile of Speed:** 34 MPH
- **95th Percentile of Speed:** 37 MPH
