Pressure Test for LP/NG Gas Piping

This section to be completed by a certified inspector.

The City of Traverse City, and Traverse City Fire Department require that pressure tests be conducted on all mobile food trucks/trailers with gas piping systems, in accordance with *NFPA-54 National Fuel Gas Code*. In the event that piping is added as a result of repairs or additions, the piping involved shall be retested.

Pressure testing methods and procedures shall be conducted in compliance with applicable codes and industry standards.

The pressure test duration shall meet minimum code requirements without observable drop (other than normal atmospheric changes.)

Pressure Test Start Date: _____ Time: _____ Pressure: _____

Pressure Test End Date: _____ Time: _____ Pressure: _____

Pressure Test Result Pass Fail

I attest under penalty of perjury that the above information regarding the pressure applied, and the duration of the pressure test is accurate.
