Issued: October 10, 2025

2025 Water Service Line Replacement Project
Week of October 13, 2025 Locations

Traverse City – Residents and businesses should be aware that Team Elmer's, in coordination with the City of Traverse City Water/Wastewater Maintenance Division, has begun the 2025 replacement of private galvanized water lines that were once hooked to lead. The water service replacement line project kicked off the week of May 2025. The project is anticipated to be completed and will be completed in fall of 2025.

The week of October 13th, the Water Service Replacement Line project will be conducted on the 600 and 1200 blocks of Union Street, the 1000 and 1200 blocks of Cass Street, and the 100, 200, and 300 blocks of Fourteenth Street. The work will result in lane closures under flag control, lane shifts, and sidewalk closures.

This work will generate dust and noise, and may cause disruptions to pedestrian, bicycle, and vehicular traffic with intermittent closures of sidewalks and streets. Appropriate signage will be in place, and access to all homes and businesses will be maintained at all times. If possible, please use alternate routes avoiding this area to reduce congestion, delay, and promote worker safety.

We would like to thank you in advance for your patience and cooperation. Please contact the Water/Wastewater Maintenance Division at (231) 922-4923 x 2 if you have any questions or concerns regarding the work.
