

CITY OF TRAVERSE CITY

FIRE HYDRANT FLOW TEST REQUEST FORM

The City of Traverse City may provide specific fire hydrant flow and pressure data when available. If this data is either outdated or unavailable, fire hydrant flow tests may be requested. Generally, a fire hydrant flow test will produce results such as static pressure, a residual pressure, and an available flow rate. To request this information, please fill out this form in its entirety.

This test can be scheduled with the Water/Sewer Maintenance Department for a fee of \$175. Please deliver this completed request form to the Water/Sewer Maintenance Building located at **604 Hannah Avenue, Traverse City, MI 49686** or email it to jcrane@traversecitymi.gov. When the completed form has been received, an invoice for the \$175 fee will be sent to the billing name and address as listed below. The Water/Sewer Maintenance Department will then complete the flow test at its earliest convenience. The results of the test will be made available to the petitioner as they become available via email.
