akrueger@traversecitymi.gov

Issued: October 28, 2025

Boardman Lake Loop Trail Closure
Detour for Roof Replacement & Solar Panel Installation on Hull Park
Boathouse

Traverse City – Pedestrians and bicyclists should be aware that the City will close a portion of the Boardman Lake Loop Trail for roof replacement and solar panel installation at the Hull Park Boathouse facility.

The trail will be closed at the Hull Park pedestrian bridge to the restroom at Hull Park on Wednesday, October 29, 2025 through Friday, November 14, 2025, weather permitting.

The roof replacement on the Hull Park Boathouse is in preparation of the City's solar panel project at the Wastewater Treatment Plant that will also include the boathouse facility. The project is being funded by Michigan Public Service Commission (MPSC) Low Carbon Infrastructure Enhancement & Development Grant in the amount of \$1,685,479.

This work will generate dust and noise, and will cause disruptions to pedestrian and bicycle traffic. Detour signage will be in place. If possible, please use alternate routes avoiding this area to reduce congestion, delay, and promote worker safety.

We would like to thank you in advance for your patience and cooperation. Please contact the Department of Municipal Utilities at (231) 922-4923 if you have any questions or concerns regarding the work.
