

The old "dirt loop" road that ran up behind the barns was too steep to reconstruct under modern road standards, so the former road bed is being repurposed for non-motorized uses. For vehicle traffic, the new turnaround area behind the barns is only for pickup, dropoff and emergency access (with the exception of the three designated accessible parking spaces). Vehicle parking is now available in the designated areas marked on this map.

THANK YOU for your understanding and cooperation, and enjoy your visit!
