Issued: August 15, 2025

2025 Water Service Line Replacement Project
Week of August 18, 2025 Locations

Traverse City – Residents and businesses should be aware that Team Elmer's, in coordination with the City of Traverse City Water/Wastewater Maintenance Division, has begun the 2025 replacement of private galvanized water lines that were once hooked to lead. The water service replacement line project kicked off the week of May 2025 and will be completed in fall of 2025.

The week of August 18th, the project will be conducted on the 100 and 200 blocks of N. Oak Street, the 200 block of Gillis Street, the 200 block of Garland Street (in the pedestrian alley), the 600 block of W. Front Street, and the 300 block of Grandview Parkway (west side of Hall Street). The work will cause sidewalk and intermittent street closures. The work on W. Front Street will result and Grandview Parkway will result in a lane closure and traffic shift.

This work will generate dust and noise, and may cause disruptions to pedestrian, bicycle, and vehicular traffic with intermittent closures of sidewalks and streets. Appropriate signage will be in place, and access to all homes and businesses will be maintained at all times. If possible, please use alternate routes avoiding this area to reduce congestion, delay, and promote worker safety.

We would like to thank you in advance for your patience and cooperation. Please contact the Water/Wastewater Maintenance Division at (231) 922-4923 x 2 if you have any questions or concerns regarding the work.
