Issued: August 28, 2026

2026 Water Service Line Replacement Project Locations
Week of August 31, 2026

Traverse City, Mich. – Residents and businesses should be aware that Team Elmer's, in coordination with the City of Traverse City Water/Wastewater Maintenance Division, continues the 2026 replacement of private galvanized water lines that were once hooked to lead. The water service replacements began in May 2026. The project is anticipated to be completed and will be completed in fall of 2026.

The week of August 31, 2026, work will be conducted on the 600 block of Rose, the 500 block of Bates, the 600 and 700 blocks of Grant, the 800 block of Hannah, and the 800 and 900 blocks of Barlow.

The work will generate dust and noise, and may cause disruptions to pedestrian, bicycle, and vehicular traffic with intermittent closures of sidewalks, streets, and lane shifts. Appropriate signage will be in place, and access to all homes and businesses will be maintained at all times. If possible, please use alternate routes avoiding this area to reduce congestion, delay, and promote worker safety.

We would like to thank you in advance for your patience and cooperation. Please contact the Water/Wastewater Maintenance Division at (231) 922-4923 x 2 if you have any questions or concerns regarding the work.
